

Communicating Learning

At Taumata School, we believe in strong partnerships between whānau and the school. When parents and teachers work together, kids do better in school. We don't just report on your child's progress once in a while. Instead, we keep you updated regularly throughout the term in simple words.

What is it?

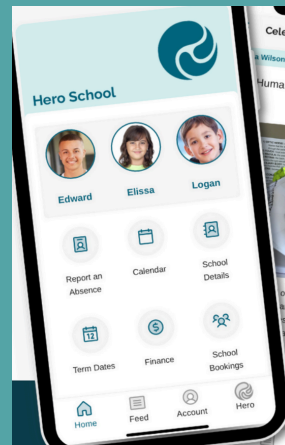

HERO is an innovative learning platform utilised by Taumata school to enhance communication between learning coaches, students, and parents. It serves as a central hub for progress and achievement updates, and resources, fostering a collaborative approach to education.

The benefit of HERO as a reporting tool - is that learning coaches can set goals that students are working on, update progress and share samples of student work as required. It is a 'one-stop' platform for all school communication about your child's learning.

Real time - Anywhere....

As parents you can access the Hero platform from anywhere, at any time within the HERO APP. Hero empowers schools to track and report on student learning, streamline communication with families, and fulfill assessment reporting and administrative needs. With the Hero App, learning can be captured and shared on the go, offering greater visibility across the holistic learning journey. Hero has transformed how the school operates and functions, enhancing efficiency and effectiveness in education delivery.
